ARIZONA CORP COMMISSION
DOCKET CONTROL 458

#6-01551A-10-0347

Dear Chairman Pierce and Commissioners,

I am a Southwest Gas customer, and I am writing to encourage you to support the energy efficiency programs and program budgets proposed by Southwest Gas in their energy efficiency implementation plan.

I am willing to incur additional charges on my bill because I understand that energy conservation programs will not only lower energy costs for everyone but will also reduce pollution and water use. In addition, more jobs can be created in the Valley. Not investing in energy efficiency will inevitably result in higher energy bills in the future because more power plants will be needed. I especially appreciate that these proposed programs provide assistance to low-income residents for energy conservation.

I encourage you to protect the interests of both today's and tomorrow's rate payers by supporting these programs

Sincerely, Sally King

Arizona Corporation Commission
